

Cope with the increasing nurse shortage through international permanent placements with ConnectSelect.

The O'Grady Peyton ConnectSelect program enables you to choose the ideal international nurses to complement your current facility staff as permanent employees. Each of our nurses is carefully prescreened according to your quality management specifications and unit needs, speaks fluent English, has excellent references and has an average of seven years' experience in U.S.-compatible acute care facilities. These exceptionally skilled and experienced professionals can be working as your core staff in less than twenty months.

O'Grady Peyton International Nurses are the World's Best Nurses

Partnering with O'Grady Peyton gives your facility instant access to the largest supply of the highest quality, international nurses from around the world. The ConnectSelect program ensures our nurses arrive as permanent U.S. residents, having passed the NCLEX exam and are fully licensed in their state of employment. In addition, our nurses meet enhanced training requirements on U.S. nursing practices and cultural perspectives.

Each nurse is carefully screened and must exhibit a high level of competence, excellent clinical capabilities and a sense of flexibility and adaptability.

How the ConnectSelect Program Works

A Simple 3-step Process

As your full-service permanent placement staffing partner, we oversee the time-consuming international nurse hiring process for you.

Step 1: We recruit and screen nurses to match your specific facility needs through our offices abroad. Once these nurses are committed to relocating to the U.S. and are interested in your facility, we fly you to one of our international offices for face-to-face interviews with the pre-screened nurses.

Step 2: We provide education and licensure for the nurses, including NCLEX preparation.

Step 3: We complete all immigration-related paperwork that includes Green Card processing for the nurses and their families.

Upon completion of this process, we provide pre and post arrival clinical support, including clinical and encultural acclimation, relocation and ongoing support, making nurses feel at home as they move across cultures and geography.

We provide ongoing clinical support to ensure our nurses are successful within your health care facility.

Pay for Success

When you recruit nurses through O'Grady Peyton ConnectSelect, we will only bill you as your chosen nurse proceeds through the licensure and immigration process. Each payment due is negotiated and clearly defined ahead of time—there are never any hidden fees.
